**Licensed Architect, UCP X
UNIVERSITY ARCHITECT
(Design, Engineering and Technical Support)
ARCHITECTURAL AND ENGINEERING SERVICES**

The University of Connecticut, Department of Architectural & Engineering Services, is seeking an experienced licensed Architect to work in the Design, Engineering and Technical Support unit.

The successful candidate will be responsible for preparing designs, plans, estimates and specifications for construction projects generally under \$500,000 in value. This includes stamping and sealing drawings as a Registered Architect in the State of Connecticut. Other duties include overseeing the work efforts of consultants in developing projects, providing technical support to a wide variety of campus constituents and conducting field observations of the work of contractors to ensure conformance with construction documents.

Qualifications include a Bachelor's degree in Architecture and a minimum of eight years professional experience in engineering, architecture or construction; professional registration as an architect in the State of Connecticut; demonstrated ability to create and interpret drawings and specifications; excellent written and oral communication skills; working knowledge of Auto CAD and Microsoft office software; sound knowledge of building codes and standards; and the ability to work with a variety of University staff, governing agencies and contractors are required. Experience with colleges or universities; experience in the design and construction of small to medium sized building projects; and the ability to read, interpret and prepare construction drawings, project schedules and budgets are highly preferred.

This is a full-time position located at the main campus in Storrs, Connecticut. Salary will be commensurate with background and experience.

Please send cover letter demonstrating that applicant meets minimum and preferred qualifications, resume documenting educational and work history with employment start/end dates, contact information of three professional references and a writing sample, such as a technical report or other, of no more than 3 pages by mail only (**no-e-mail submissions will be accepted**) to Search Committee #2010111, University of Connecticut, Architectural and Engineering Services, 31 LeDoyt Road, Unit 3038, Storrs, CT 06269-3038. We encourage applications from under-represented groups, including minorities, women and people with disabilities. Screening will begin immediately and continue until filled. (Search #2010111)
